

WE HOPE YOU ENJOYED TAKING PART IN YOUR SCOOT SAFE TRAINING

Here are a few things to remember
when using your scooter...

1

Make sure you always wear a helmet, particularly, if you are scooting near roads.

2

Make sure that you can be seen when scooting on darker evenings. Wear a reflective jacket or strip and attach a light to your scooter.

3

Do regular checks on your scooter to keep it in good working condition. Check the scooter's brakes and wheels weekly.

4

Don't forget to bend your knees and push hard on the brake when stopping. Don't drag your feet along the ground to stop!

5

Keep aware of things around you when scooting. Don't scoot too fast on pavements and always keep away from the edge of the road and other pavement users.

6
